

## Technical Data Sheet

### FLEXOGRIP™ CE DH5130 FLEXOGRIP™ CE DH5160

#### DESCRIPTION

- protective glove suitable for electrostatic ambient
- Synthetic coating on a synthetic textile liner.
- 2 versions available:
  - ✓Palm fit coating (FLEXOGRIP CE DH5130)
  - ✓Finger tips coating (FLEXOGRIP CE DH5160)
- Elastic knit with elasticated bead to ensure best snug fit at wrist.
- 5 sizes available: 6, 7, 8, 9 and 10.
- Trade unit: 12 pairs, 144 pairs in a transit case.

#### CHARACTERISTICS

- Glove knitted with a seamless non-stop process.
- Textile liner made of polyamide continuous thread, included carbon fibers.
- Fine and stretchable stitches for an excellent comfort.
- Stretchable polyurethane coating silicone free
- In compliance with standards EN420 (General requirements), EN388 (Mechanical Hazards) and pr. 1149-2 (Protective clothes, Antistatic properties) certified by notified laboratory.

#### PERFORMANCES

- Excellent comfort and dexterity.
- Dissipative Antistatic properties thanks to its low surface resistivity

- Lint-free glove. 

#### APPLICATIONS

- Ideal for fine tactile handling, light assembly, electronics industry and photographic laboratory where there is a risk of electrostatic discharge.

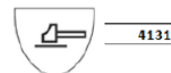

#### LIMITATIONS

- Do not use for handling liquids and pointed objects.
- Do not use with rotating machines in which glove may get caught.
- Glove is not ex-proof

This glove is certified to comply with the essential requirements of European Directive EEC/89/686 of December 21<sup>st</sup>, 1989 relative to Personal Protective Equipment submitted to CE type examination issued by a notified laboratory, who certifies the conformity of this glove with the EN standards to which it responds and certifies the performance levels obtained during tests.
