

NITRAFLEX™ 11-02

DESCRIPTION

- Industrial protective glove for chemical application
- Green nitrile coating on a fine poly cotton textile liner, cut & sawn
- Length circa 14"/35cm
- Six sizes, from 6 to 11

CHARACTERISTICS

- Glove designed to give protection to full hand, the wrist and the forearm
- Cuff shape ideal for an easy donning
- Cotton liner ensure the best sweat absorption
- Certified by notified CE body in compliance with the standards:
 - EN420:2003 (General requirements)
 - EN388:2003 (Mechanical hazards)
 - EN374-1:2003 (Chemical hazards)

PERFORMANCES

- This glove offers good flexibility and thus dexterity, with a good overall mechanical resistance
- Suitable for chemical application, waterproof, the nitrile coating offers good resistance to oils, greases, gasoline, petrol, alcohol, alkali, salts, etc.

APPLICATIONS

- Heavy jobs in chemical industries, e.g. drums handling, production line cleaning
- All mechanical application where workers use plenty of lubricants

LIMITATIONS

- Do not use for handling liquids.
- Chemical substances do continue their attack to glove coating polymer during contact. A glove left unused but dirty, is continuously damaged by the chemical substance. Keep the glove clean after use by using the appropriate cleaning/rinsing methods foresee by law. Contact your safety and/or environmental manager if in doubt

This glove is certified to comply with the essential requirements of European Directive EEC/89/686 of December 21st, 1989 relative to Personal Protective Equipment submitted to CE type examination issued by a notified laboratory, who certifies the conformity of this glove with the EN standards to which it responds and certifies the performance levels obtained during tests.
